

New, state-of-the-art, high-speed trainsets are coming to the United States. Building on Amtrak's expertise as the only high speed rail operator in the U.S. and Alstom's record of delivering world class, proven, high speed trainsets—Amtrak and Alstom have partnered to introduce the new *Acela* fleet. These new trainsets will redefine the customer experience on Amtrak's Northeast Corridor.

Scheduled to enter service on the NEC in 2021, the new trains will provide world-class accommodations and amenities, along with an even more comfortable ride. The new high speed trains will operate at 160 mph. Each train will have 386 seats, with spacious, high-end comfort customers expect, including personal outlets, USB ports and adjustable reading lights at every seat. Additional features include:

- Contemporary food service, offering easy access and greater selection
- Advanced seat reservation system
- Onboard information system providing real time information such as location, train speed and conductor announcements
- Accessibility features for people with disabilities
- Spacious restrooms with a 60-inch diameter turning radius
- Streamlined overhead luggage compartment

Project Summary

Timeline: The first trainset prototype will be ready for testing in 2019 and will enter revenue service in 2021, with all trainsets in service in 2022.

Funding: RRIF Loan backed by NEC revenues

Partners: US DOT Federal Railroad Administration and Alstom

in over 90 cities across the United States

Acela Success Story

Amtrak's Acela service is a remarkable success story. From approximately 2.5 million passengers in 2002 to approximately 3.5 million passengers in 2019, Acela has experienced significant growth in revenue and market share in the Northeast. Acela is the premium service on the nation's busiest rail corridor.

Each day, 750,000 people board commuter and Amtrak trains to head to work, school and other destinations, making the NEC a major driver of the regional and national economy. Nearly one-third of the region's jobs are located within five miles of an NEC station. The region is home to nearly a quarter of the nation's top universities, a fifth of the Fortune 500 company headquarters, and many top hospitals.

Enhanced Safety Systems

The new *Acela* trains will feature cutting-edge safety systems to provide real-time monitoring and ensure a safe and comfortable ride. Interior safety details include handles integrated into the seatbacks to aid customers walking through the train, grab bars for stability and gap fillers to cover the space between the train and the platform, creating a smooth surface for entering/exiting the train.

Commitment to Sustainability

Our new trainsets have been efficiently designed to use 40 percent less energy per passenger and feature sustainable components including seating made out of recycled leather. Amtrak is proud to expand our robust recycling program and offer a new sustainable food and beverage program onboard our *Acela* trains.
